

Junior Account Manager

FF03 Sales and account management · ISCO-08 3322 · CBS 0311 Marketing, public relations, and sales consultants · seniority junior · Also known as: Junior Sales Representative, Graduate Sales Trainee

Builds an own customer portfolio under guidance, holds first conversations, prepares quotations, and learns the sales process and product knowledge in practice.

The junior account manager works with smaller customers or a defined part of a portfolio, usually with an experienced colleague as coach. Unlike an account manager, this role is not yet expected to deliver a full annual target independently. Selection often waits for experience that cannot yet exist, while learning capability and persisting with cold acquisition after rejection are the real predictors.

5 Behavioural anchors per skill

Anchors sit at N1, N3 and N5. N2 and N4 are deliberately not anchored: raters interpolate between them, following the O*NET convention.

Skill	N1	N3	N5
Perseverance Keeps working towards a goal when the work brings resistance, repetition or disappointing interim results, and looks for another route to the same goal.	Picks up a task again after a failed attempt once the supervisor shows how it can be done differently.	Keeps seeking alternative routes on a stalled case and involves others in that search on own initiative.	Keeps multi year programmes on course despite sustained opposition and holds the organisation to the chosen direction after setbacks.
Persuasiveness Moving others towards a position, decision or behaviour they initially resisted, using substantive arguments, examples and personal presence.	Puts forward an own proposal in a meeting and supports it with one concrete example from practice.	Chooses per counterpart the argument that matches their interest and checks along the way whether the agreement is genuine.	Wins board and external parties over to a far reaching change of course and sustains that support when resistance increases.

Skill	N1	N3	N5
Client focus Acting from the question and interest of the client, keeping agreements and visibly directing own work towards usefulness for that client.	Responds to client questions within the agreed term and refers on when the answer falls outside own task.	Uncovers the real need behind a client question, makes a fitting proposal and checks after delivery whether it works.	Translates client signals into changes in services and policy and holds the organisation accountable for the promised client experience.
Result orientation Directs own action at agreed results, keeps progress towards those results in view and chooses activities that bring the goal closer.	Finishes the assigned task within the stated norm and reports to the supervisor what has been achieved.	Translates an assignment into measurable interim goals, measures progress and drops activities that do not contribute to the result.	Sets the result agreements and performance measures for the organisation and upholds them when interests in play are conflicting.
Learning capability Absorbs new information, rules and working methods quickly, sees the underlying principle and applies it in a task not carried out before.	Learns a new operation after one demonstration and repeats it step by step in the same situation.	Masters a new working method without a course, names the principle behind it and works independently within a few days.	Grasps an unfamiliar field within a short time, maps its core principles and uses them to substantiate policy choices for the organisation.
Commercial capability Recognises opportunities for revenue and margin in contacts with customers and the market, and acts on them with offers and agreements.	Reports to the account manager which customer wish could lead to an additional assignment.	Discusses additional services with existing customers on own initiative and records the revenue opportunity in the customer file.	Sets the commercial course for the organisation, chooses which markets are served and accounts for those choices to the board.
Consultative selling Explores the question behind a customer question, links it to a fitting solution and substantiates the proposal with customer benefit.	Asks the prepared open questions in a sales conversation and summarises the customer need out loud.	Uncovers the underlying interests of several counterparts by probing and adjusts the proposal to these during the conversation.	Guides complex sales processes with several decision makers, designs the conversation method and trains colleagues in applying it.
Conversation management Opening, steering and closing a conversation purposefully by asking questions, summarising and making concrete agreements about what happens next.	Follows a prepared list of questions, asks them in the given order and records the agreements that were made.	Chooses a fitting question type for each phase, summarises along the way and steers the conversation back to its goal when it drifts.	Leads conversations with opposing interests at board level, develops conversation models for the organisation and tests them against practice.

Skill	N1	N3	N5
Listening and probing Taking in the message of the other party fully, checking whether it is understood correctly and using targeted questions to surface underlying interests and assumptions.	Lets the other person finish speaking, takes notes and afterwards asks about anything that stayed unclear.	Summarises both the content and the feeling of the other party and probes until the real interest behind the request becomes visible.	Picks up sensitive signals in conversations with directors and supervisors and uses them to adjust organisational policy in good time.
Negotiating Reaching an agreement with one or more parties by exploring interests, using trade offs and consciously holding agreed limits.	Negotiates delivery time or price within fixed margins and refers any deviation to the manager.	Prepares a range and a fallback option beforehand, trades points of unequal weight and closes with written confirmation.	Leads negotiations on multi year contracts or employment terms, sets the mandate and defines the negotiating line for the organisation.
networking Making new contacts inside and outside the organisation, showing mutual benefit and actively keeping the contact alive afterwards.	Introduces themselves to unknown participants at an event and records with whom they spoke.	Determines which contacts own work requires, actively establishes them and maintains them at regular intervals.	Builds a network across the profession and the value chain, brings parties together and uses it for the organisation's position.
relationship management Maintaining existing relationships with clients, colleagues or partners by planning contact moments, keeping agreements and picking up signals in good time.	Keeps contact details and agreements with relations up to date and responds to questions within the agreed time.	Plans contact moments for an own portfolio of relations, discusses satisfaction and starts improvement actions when signals appear.	Decides how the organisation maintains strategic relations, assigns ownership and assesses the value of the relationship portfolio.
Acquisition and lead generation Finds and approaches new customers through network, telephone, email and online channels, and turns interest into a concrete conversation.	Calls a supplied list of prospects following a fixed conversation outline and records the outcome for each contact.	Builds an own prospect list from market and network information and books new first conversations with it every week.	Develops the acquisition approach for the whole organisation, chooses channels and messages and tests these against achieved conversion.

Skill	N1	N3	N5
Market orientation Follows what happens in the market, with customers and with competitors and includes that information in own choices and proposals.	Reads the customer newsletter and the sector news and raises striking signals during the team meeting.	Links signals from customers and competitors to the own offering and proposes adjustments on that basis.	Translates market developments into the strategic agenda of the organisation and repositions the offering for the longer term.
Sales forecasting and pipeline management Records ongoing sales opportunities by stage, estimates probability and revenue and translates this into a forecast for the coming period.	Updates the status of own sales opportunities in the customer system and reports which opportunities have lapsed.	Substantiates the own monthly forecast with opportunity stages and historical conversion and explains deviations from the previous forecast.	Sets up the forecasting method for the whole sales organisation and uses the outcomes for capacity and investment decisions.
Service calls and telephone contact Handling client contacts by telephone and chat with a fixed structure, controlled questioning and a closing that contains a concrete agreement.	Answers according to the script, registers the question in the system and transfers the caller to the right colleague.	Settles unusual questions within a single call, keeps call time under control and audibly summarises the agreement made.	Designs conversation models and quality standards for the contact centre and reviews recordings to support coaching and system choices.
Recovery after setbacks Resumes work shortly after a rejection, mistake or failed project, names what the setback teaches and adjusts the approach accordingly.	Starts again after a rejected result as soon as the supervisor has indicated what needs to change.	Analyses after a failed effort what went wrong, discusses it with those involved and starts a revised approach within a week.	Gets the organisation moving again after a major loss and organises that lessons from failures are structurally acted upon.
Curiosity and exploring Asks questions about the unfamiliar, seeks out new topics and perspectives unprompted and explores them further than the work strictly requires.	Asks follow up questions during an explanation about a new topic and reads the background material provided.	Gathers information on new methods outside the own team and brings findings into the work meeting unprompted.	Explores developments outside the sector systematically, connects unexpected findings and puts new themes on the agenda of the organisation.

Skill	N1	N3	N5
Account management Maintains the relationship with assigned customers, plans contact moments, follows up agreements and ensures the customer interest lands inside the organisation.	Keeps customer contact details and agreements up to date in the system and reminds the account manager of open actions.	Independently carries out an account plan for an own customer portfolio and discusses results and plans with the customer yearly.	Determines the approach for strategic customers of the organisation and sits at board level to discuss multi year cooperation.
Contracting and closing Converts a verbal agreement into a valid offer and contract, clears remaining objections and gets the customer to sign.	Fills in a standard agreement with the agreed details and checks whether all annexes are present.	Recognises buying signals, names the remaining objection and puts a signable proposal on the table within own authority.	Designs the contract forms and mandates for the organisation and decides on exceptions in deals with major financial impact.
Value proposition development Formulates for a target group which problem the offering solves, what it delivers and how it differs from the alternatives.	Describes the features and benefits of an existing product in simple customer language following a fixed format.	Develops a proposition for a target group using customer information and tests it in conversations with existing customers.	Determines the proposition portfolio of the organisation, chooses which propositions are dropped and links them to the multi year strategy.
Managing customer value and retention Measures revenue, margin and churn per customer group and deploys actions to retain valuable customers and let them grow.	Signals customers who buy less than usual and reports this to the responsible colleague.	Analyses churn and customer value in the own portfolio and carries out targeted retention actions with measurable results.	Determines the retention policy of the organisation, sets standards for customer value and decides on investments in retention.
Time management and prioritising Allocates available time across tasks by urgency and importance, sets a sequence and adjusts it when new work arrives during the period.	Follows a task list provided by others and asks which task takes priority whenever new requests arrive.	Ranks own work by urgency and importance, builds in buffer time and explains to others why an item will arrive later.	Sets prioritisation agreements and planning standards across the organisation and decides which work streams receive time and capacity when both are scarce.
Price negotiation Sets room and limits on price and conditions in advance, exchanges concessions during the conversation and closes within the own margin.	Follows the established price list and discount rules and refers deviating customer requests to the manager.	Prepares a range and trading items for each negotiation and holds on to the agreed lower limit under pressure.	Sets the pricing and discount policy of the organisation and personally negotiates the framework contracts with the largest parties.

Skill	N1	N3	N5
Reporting and dashboard building Builds recurring reports and dashboards that show the right indicators for an agreed audience and keeps their definitions up to date.	Fills an existing dashboard or report template with current figures and checks the display for errors.	Designs a dashboard together with the user, chooses indicators and definitions and processes user feedback into new versions.	Determines which management information the organisation uses and keeps definitions unambiguous across all reporting.

6 Assessment methods and validity

The validities are the corrected meta-analytic estimates from Sackett, Zhang, Berry and Lievens (2022) in the Journal of Applied Psychology, which replace the older Schmidt and Hunter (1998) figures. The spread matters as much as the mean: with a high SD, validity varies strongly by context.

Assessment method	rho	SD	What it is
Personality questionnaire	0.40	0.15	Self-report of behavioural preferences. At hrnforce the Big Fifty and the 15PF.
Assessment centre	0.29	0.09	Multiple exercises, multiple assessors, dimension-wise scoring.
360-degree feedback	-	-	Multiple raters around the person rate behaviour against behavioural anchors.
Cognitive ability test	0.41	0.14	Standardised test of verbal, numerical or abstract reasoning.
Structured interview	0.42	0.19	Behaviour-based interview with fixed questions and a rating scale per question.
Work sample test	0.33	0.09	The candidate performs a representative work sample under standardised conditions.

8 How to use this profile

1. Agree the profile with the hiring manager before the first candidate is measured. Weights shifted afterwards make the outcome indefensible.
2. Choose the assessment method per skill from the Assessment method column. Combine at most three methods per candidate.
3. Calibrate the assessors in a two-hour session using the anchors in chapter 5. Anchors without rater training deliver little.
4. Fill in the match calculator and discuss the gaps in the development conversation. Type A and type G are selection criteria, not one-quarter development goals.
